Summary

Project manager and engineer running the IT portfolio of a Riyadh IP-services firm: five production systems — an IP-management platform with **52 live services**, a trademark-watch pipeline across **21 countries**, automation, reporting, and the company site + AI agent. Ran a **four-vendor RFQ** for trademark watch, then designed and led the in-house build: a bilingual Arabic/English matching funnel (Nice-class filter → vector search → phonetic/visual/semantic rank → LLM verdict) judged against historical cases before anyone relied on it. Hands-on in Django, Vue and PostgreSQL; in industry since 2022.

Experience

Saudi Intellectual Property Rights Company (SIPRC)

Jul 2025 – Present

IP-services firm — Riyadh, KSA

Project Manager, IT Projects

Mar 2026 – Present

- **Own the IT portfolio: five production systems** — IPORA (IP management, **52 live services**), TM Watch (trademark monitoring), automation, custom reporting module, SIPRC.sa + AI agent — requirements and procurement to release.
- Ran a **four-vendor RFQ** for TM Watch (registries across **21 countries**, 12 languages, 8,000–20,000 new marks/day, <1 h publication-to-notification), then **designed and led the in-house build**; now in production.
- Designed the bilingual Arabic/English matching funnel — Nice-class filter → vector search → phonetic/visual/semantic rank → LLM verdict — and **judged it against historical cases** before operations relied on it.
- **Rejected a completed Power BI build** that missed business needs and re-scoped it as a custom module inside IPORA; led a **cloud migration with zero downtime**.

Senior Frontend Engineer → Full-Stack Engineer

Jul 2025 – Mar 2026

- **Sole architect and builder of IPORA**, empty repo to production (Nuxt 3 + TypeScript, Django + PostgreSQL, bilingual RTL, role-scoped access, bilingual client PDF reports) — now the operations team's daily system of record.
- **Owned the cepro.ai rebuild** on Next.js 15 + React 19 — 17 pages, in-browser Arabic OCR — delivered **two weeks early**; built the Cepro brand-protection dashboard from zero. [cepro.ai](#)
- **Founded the QA practice**: 530+ Selenium test cases across 170+ features, manual regression down **40%**; 59-page developer docs that **halved onboarding**.

Frontend Engineer

2024 – 2025

Digitee (Nexxora Holding) — AI-powered fashion technology, remote

- **Sole frontend engineer**: six production apps zero to launch — Mintora print-on-demand, AR virtual try-on (TensorFlow.js + MediaPipe Pose), Three.js 3D showroom, five-country e-commerce (PayPal + Kashier, five languages), B2B dashboard with AI image generation and 16-language RTL i18n.

Frontend Engineer

2023 – 2024

IDAAM — Brain Health Technology, USA, remote

- Built front-end modules for **Keme**, a US clinic-management platform (Vue 3): patients, appointments, telehealth, billing — against a Laravel REST API.

Frontend Developer (Freelance)

2022 – 2023

Independent — remote

- Four client projects, requirements to deployment: **Climate Risk Assessment Tool** (PhD research, Leaflet maps), **Lusion 3D** (Three.js WebGL), fitness e-commerce (Django REST), User Management Dashboard (TypeScript, Cypress E2E, EN/AR RTL).

Skills

Delivery: IT project portfolio management, vendor RFQ & selection, procurement, scoping and build-vs-buy, bilingual status reporting, risk & release management · **Engineering**: Python, Django, PostgreSQL, Vue 3 / Nuxt 3, TypeScript, React / Next.js, Docker, OCI / AWS, Playwright, Selenium; LLM pipelines, vector search, evaluation against historical cases · **Domain**: trademark & IP operations, brand protection, Arabic/English RTL, WCAG 2.1 · **Open source**: [claude-account-switcher](#) (MIT, CI, tested) · [tm-similarity-funnel](#) · [vue-intent](#)

Education & Languages

B.Sc. Computer Science, Assiut University — Egypt, 2019 – 2023

Languages: Arabic (native) · English (professional)
