Summary

Technical project manager who came up through engineering. Runs the IT portfolio of a Riyadh IP-services firm: five production systems, including a trademark-monitoring platform taken from a **four-vendor evaluation** to an in-house build in production, and an IP-management platform (**52 IP services live**) built hands-on before moving into the role. Django, Vue, PostgreSQL; Arabic/English; in industry since 2022.

Experience

Saudi Intellectual Property Rights Company (SIPRC) — *IP-services firm, Riyadh, KSA*

Jul 2025 – Present

Project Manager, IT Projects

Mar 2026 – Present

- Own the IT portfolio: **five production systems** — IP management (**52 IP services live**), trademark monitoring, automation, custom reporting, company website with an AI agent — from requirements and procurement through release and maintenance.
- Wrote the requirements for the trademark-monitoring platform, ran a **four-vendor evaluation**, made the build-vs-buy call, and led the in-house build **to production**.
- Made validation against historical outcomes a **rollout gate** for any model output that drives a legal recommendation.
- After the business rejected a completed Power BI build, re-scoped reporting as a custom module; led a cloud migration with **zero downtime**.

Senior Frontend Engineer, then Full-Stack Engineer

Jul 2025 – Mar 2026

- Built the IP-management platform end to end on a commercial admin base (data model, modules, role-scoped access, Arabic/English), adopted as the operations team's **daily system of record**. Nuxt, Django, PostgreSQL.
- Owned the [cepro.ai](#) rebuild for group company Cepro (17 pages, in-browser Arabic OCR), delivered **two weeks early**; built the siprc.sa website and its AI customer-support assistant.
- Founded the QA practice: 530+ Selenium test cases across 170+ features, manual regression down **40%**; wrote 59-page developer docs that **halved onboarding**.

Frontend Engineer, contractor then full-time

May 2025 – Jul 2025

Cepro (SIPRC group) — brand protection

- Built the Cepro brand-protection dashboard from zero (Vue 3 + Django): role-based access and SLA-tracked takedown workflows; moved to the parent company SIPRC in Jul 2025.

Frontend Engineer

2024 – 2025

Digitree (Nexxora Holding) — AI-powered fashion technology, remote

- Sole frontend engineer across **six production apps** taken from zero to launch, including five-country consumer e-commerce (PayPal + Kashier, five languages), AR virtual try-on and a B2B dashboard with AI image generation, extended to **16 locales** with full RTL.

Frontend Engineer

2023 – 2024

IDAAM — Brain Health Technology, USA, remote

- Built front-end modules for Keme, a US clinic-management platform (Vue 3): patients, appointments, telehealth and billing, against a Laravel REST API.

Frontend Developer

2022 – 2023

Freelance — remote

- Client projects, requirements to deployment, including a climate-risk assessment tool for PhD research (Leaflet maps).

Selected Projects

- Tibyn** (freelance, Aug – Sep 2026) — UI/UX audit remediation for Nobel Business's aquaculture SaaS: closed **41 of 44** findings, each reproduced in a real browser first; frontend tests 413 → **436**, no regressions. [tibyn.ai](#)

Skills

Delivery: IT portfolio management, requirements, vendor evaluation, build-vs-buy, release management, risk, bilingual reporting

Engineering: Python, Django, PostgreSQL, Vue 3 / Nuxt 3, TypeScript, React / Next.js, REST APIs, Docker, OCI / AWS

AI: model output validated against historical outcomes, AI customer-support assistant, in-browser OCR

Domain: IP operations, brand protection, Arabic/English RTL

Open source (delivery tooling): [phasegate](#) (phase-gate CLI + GitHub Action) · [decision-matrix](#) (build-vs-buy decisions) · [django-postmortem](#) (blameless incident reviews)

Teaching: workshop "From Requirements to Clean Code" (Dec 2025) · [devfist.vercel.app](#)

Education & Languages

B.Sc. Computer Science, Assiut University — Egypt, 2019 – 2023

Languages: Arabic (native) · English (professional)
