Summary

Full-stack engineer (Python/Django, Vue/TypeScript) who takes AI features to production. Built the siprc.sa **AI customer-support assistant**; led the in-house build of a trademark-monitoring platform whose model output ships only after **validation against historical outcomes**; built an IP-management platform end to end (**52 IP services live**). In industry since 2022.

Experience

Saudi Intellectual Property Rights Company (SIPRC) — *IP-services firm, Riyadh, KSA*

Jul 2025 – Present

Project Manager, IT Projects

Mar 2026 – Present

- Wrote the requirements for the trademark-monitoring platform, ran a four-vendor evaluation, made the build-vs-buy call, and **led the in-house build to production** (Python, Django, PostgreSQL, Docker, OCI/AWS).
- Made validation against historical outcomes a **release gate** for model output that drives legal recommendations.
- Own the IT portfolio of **five production systems** from requirements and procurement to release; led a cloud migration with **zero downtime**.

Senior Frontend Engineer, then Full-Stack Engineer

Jul 2025 – Mar 2026

- Built the IP-management platform end to end on a commercial admin base (Django + PostgreSQL, Nuxt 3 + TypeScript): data model, modules, role-scoped access, Arabic/English RTL; **52 IP services live**.
- Built the siprc.sa company website and its AI customer-support assistant** (TypeScript, Vite, GSAP; Arabic/English), live in production.
- Owned the **cepro.ai** rebuild on Next.js 15 + React 19: 17 bilingual pages with **in-browser Arabic OCR** (Tesseract.js), delivered **two weeks early**.
- Founded the QA practice: 530+ automated Selenium test cases across 170+ features, cutting manual regression testing **40%**; wrote 59-page developer docs that **halved onboarding**.

Frontend Engineer, contractor then full-time

May 2025 – Jul 2025

Cepro (SIPRC group) — brand protection

- Built the Cepro brand-protection dashboard from zero (Vue 3 + Django): role-based access and SLA-tracked takedown workflows; moved to the parent company SIPRC in Jul 2025.

Frontend Engineer

2024 – 2025

Digitree (Nexxora Holding) — AI-powered fashion technology, remote

- Shipped in-browser ML and AI features as sole frontend engineer across **six production apps**: AR virtual try-on (TensorFlow.js + MediaPipe Pose), and a B2B dashboard with AI image generation (**16 locales**, full RTL).

Frontend Engineer

2023 – 2024

IDAAM — Brain Health Technology, USA, remote

- Built front-end modules for Keme, a US clinic-management platform (Vue 3): patients, appointments, telehealth and billing, against a Laravel REST API.

Frontend Developer

2022 – 2023

Freelance — remote

- Client projects, requirements to deployment, including a climate-risk assessment tool for PhD research (Leaflet maps).

Selected Projects

- SafeMe** (side project, 2024) — AI tool that detects and obscures sensitive data in images, documents and live webcam video.
- Tibyn** (freelance, Aug – Sep 2026) — UI/UX audit remediation for Nobel Business's aquaculture SaaS: closed **41 of 44** findings, each reproduced in a real browser first; frontend tests 413 → **436**, no regressions. [tibyn.ai](#)
- claude-account-switcher** (open source) — runs several Claude Code accounts with automatic failover; **232 checks**, Linux and macOS. [GitHub](#)

Skills

AI & evaluation: AI assistant integration, model-output validation against historical outcomes, Tesseract.js OCR, TensorFlow.js

Backend: Python, Django, Django REST, REST APIs, PostgreSQL, Docker, OCI / AWS · **Frontend:** Vue 3 / Nuxt 3, React 19 / Next.js 15, TypeScript · **Testing & CI:** Selenium, Playwright, CI/CD, GitHub Actions

Open source: [django-postmortem](#) (133 tests) · [phasegate](#) (86 tests) · [vue-rtl-kit](#) & [django-rtl-admin](#) (298 tests)

Education & Languages

B.Sc. Computer Science, Assiut University — Egypt, 2019 – 2023

Languages: Arabic (native) · English (professional)
